Art Unit: 1624

Applicant's amendments and remarks filed 8/7/03 and 9/17/03 have been received and reviewed. Claims 5-8, 15 and 16 are now pending in this application.

***Claim Rejections - 35 USC § 102***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim 15 is rejected under 35 U.S.C. 102(b) as being anticipated by Graul et al. (Drugs of the Future 1998, 23(6): 591-597) or Agouridas et al (EP 680 967). The references teach the use of telithromycin to treat bacterial infection. The method of treating a bacterial infection using telithromycin (in whichever form, e.g. solution, capsules, IV, etc.) is not novel.

***Claim Rejections - 35 USC § 112***

Claims 5-8, 15 and 16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

i) Claim 5 is unclear as to the what the "phase which is insoluble in telithromycin" is.

Telithromycin is not a solvent to begin with. Also, how is this phase applied? Is it sprayed on the crystals after it has dried (i.e. the solvent is removed) or while it is still in solution? A clarification is requested.

ii) Claim 15 is presented using improper Markush language. It is suggested to rewrite the claim in singular form, such as "A method of treating a bacterial infection in a human comprising administering to a human in need thereof an antibactericidally effective amount of a compound ...".

Art Unit: 1624

iii) Is claim 16 adding a further layer to the product formed in claim 5 or is it simply a capsule as known in the art?
